PROFESSIONAL SUMMARY

Cybersecurity Engineering student with hands-on experience in web application security, vulnerability assessment, penetration testing fundamentals, Linux, networking, and security-focused software development. Experienced in building cybersecurity projects using Python, React, FastAPI, MongoDB and machine learning. Strong interest in Application Security, VAPT, Offensive Security and Security Engineering.

TECHNICAL SKILLS

Cybersecurity	VAPT, Web Application Security, OWASP Top 10, Vulnerability Assessment, Security Testing, API Security, Network Security, Secure Configuration
Security Tools	Burp Suite, Nmap, Wireshark, Metasploit, Kali Linux
Programming	Python, Bash, PHP, JavaScript
Web & Backend	HTML, CSS, React.js, FastAPI, REST APIs
Database & Tools	MongoDB, MySQL, Git, Linux
Security Concepts	Authentication, Authorization, Session Management, Secure Coding, Threat Analysis, Secure Deployment

PROJECTS

Pegasus-Pro — Android Offensive Security Tool

Python • ADB • Android Security • Offensive Security

- Developed an Android security testing tool for authorized lab environments.
- Automated ADB-based device interaction and offensive security testing workflows

Blockchain-Based Fake Profile Detection

React JSX • CSS • Python • FastAPI • MongoDB • Blockchain • Machine Learning

- Developed an ML-based system to detect and classify potentially fake social-media profiles.
- Used a trained dataset with machine-learning classification and blockchain-based integrity mechanisms.
- Built the frontend using React JSX/CSS and backend APIs using Python FastAPI with MongoDB

Onion Web Development & Security

Tor • Nginx • PHP • Linux • Web Security

- Developed and deployed a privacy-focused web application within a controlled Tor environment.
- Implemented secure routing, authentication, session management and administrative functionality.
- Applied web-security practices including access control, URL protection and server hardening.

DDoS Attack & Stress Testing Tool

Python • Networking • Offensive Security

- Developed a controlled DDoS/stress-testing tool to study network availability and service resilience.
- Implemented traffic-generation and monitoring capabilities for authorized security testing.

EDUCATION

B.E. — Cyber Security	Sri Sai Ranganathan Engineering College	2024–27 CGPA: 8.21/10
Diploma — Computer Science	Sri Ramakrishna Polytechnic College	2022–24 Percentage: 89/100
